Work Experience

KPMG, Silicon Valley, CA

Winter 2019 - Present

Senior Associate Financial Due Diligence, CPA

- Industry experience includes: technology, media, and telecommunications
- Perform high-quality diligence procedures to obtain an understanding of target companies' financial statements and valuation; procedures were focused on the company's balance sheets, income statements, deferred revenue, net working capital, net debt, EBITDA, accounting policy integration required post-transaction, and ASC 606 implementation
- Perform top-line analyses on target companies, including pipeline, backlog, recurring revenue, and customer retention, to provide insight and feedback on the financial health of the company and to highlight key areas that require improvement
- Organize and lead meetings with target companies' management (e.g., CEO, CFO, Controller, and CAO) to discuss key financial metrics and the strategic direction of the company
- Organize robust databases via Microsoft Excel and Alteryx utilizing target companies' trial balances and billings / bookings transaction details in order to generate financial data in a presentable format (e.g., charts and tables)
- Work alongside companies' financial modeling teams to provide feedback on key assumptions and drivers of the financial model based on diligence procedures
- Review customer contracts to identify any unique terms and conditions (e.g., termination for convenience, tiered pricing, title transfer, etc.) which can potentially impact the target company's revenue recognition policies
- Lead and direct team members to ensure the team is working efficiently and effectively to meet reporting deadlines while performing high quality diligence procedures
- Currently holds an active CPA license

Ernst & Young, Los Angeles, CA

Fall 2018 - Winter 2019

Assurance Senior, CPA

- Industry experience includes: retail / consumer products, real estate, and media
- Performed high quality audit procedures, including quarter reviews and year-end audits, for companies generating over \$2 billion in revenue
- Performed data analytics procedures over revenue, accounts receivable, and cash accounts for a motorsports company with greater than 600,000 unit sales; performed analysis of the correlation to identify any fraudulent activity
- Performed audit procedures for complex accounts, including sales incentives for an automobile company with greater than \$150 million of incentives per year, to verify that the balance is properly stated on the financial statements
- Organized and coordinated inventory procedures for a company maintaining greater than \$240 million in inventory with warehouse personnel and EY staff to ensure that inventory observation procedures are properly performed in compliance with client regulations and EY standards
- Reviewed and provided feedback for work completed by staff to improve team development

Ernst & Young, Los Angeles, CA

Summer 2016 - Summer 2018

Assurance Staff, CPA

- Responsible for numerous business accounts, including fixed assets, accrued expenses, and accounts receivable, which was analyzed and tested properly through substantive audit procedures and inquiries with client personnel
- Performed tests of transactions, tests of details, and substantive analytical procedures in accordance with accounting standards and regulations to ensure misstatements are properly identified on the financial statements
- Performed walkthrough and test of control procedures to ensure the company had an appropriate control environment
